ANNUAL SUBJECT INDEX

Affinity spectrum analysis
Fourier-derived, ligand-binding systems, binding heterogeneity, 189
AMAP
IBM PC AT stochastic relaxation, DNA mapping, 107
Amino acid sequence
immunoglobulin domains, 319
Amphipathic helix
significance test, HIV/MHV envelope proteins, 165
ART
Sun 3/260 Workstation, experimental design, protein structure–function relationships, 205
Artificial intelligence
SHIRKA, object-centred representation, taxonomy, 383
Atari ST
character separation indices, equivocal binary data, 67
Olga oligonucleotide primer design, PCR, 124

BASIC
2D-helical representation protein, hydrophobic cluster analysis, 3
character separation indices, equivocal binary data, 67
database management, 289
IBM compatible, enzyme kinetics, 395
prediction B cell/T cell epitopes, proteins, EPIPLOT, 101
PROLANG, protein chemistry applications, 128
THOYO, DNA sequence optimization, 399
BBC microcomputer
chordotonal organ discharge patterns, precise mechanical stimuli, PC adaptation, 179
BISANCE
DNA sequence database, 355

C
algorithm, DNA restriction maps, 247
gm, DNA sequence analysis, 263
Sun 3/75 UNIX Workstation, affinity spectrum analysis, 189
Sun 4, DNA sequence similarities, 373
Sun 4, neural network, 319
VME, POLCA, 271
C environment
IBM, MUCIDS, 229
Character separation indices
equivocal binary data, BASIC, Atari ST, 67
Chemical rate equation
Taylor expansion formula, biochemical system simulation, 173
Coronary artery stenosis
^{201}Tl scintigram, Dempster–Shafer theory, 333
COSY
enzyme kinetics equilibrium data, 213
Covariation analysis
RNA structure detection, 365
CRAY
RNA secondary structure prediction, 7
Crystallographic protein determination
coronas, sectors, square matrices, fast algorithm, 19

Database
DNA/protein sequence, FASTDB, 237
object-oriented, 357
protein sequence analysis program, Scrutineer, 279
protein sequence, PROLANG, 403
protein/DNA databank search, STATSEARCH, 293
Database management
CDS/ISIS, MS-DOS, 126
ecology, taxonomy, zoogeography, 289
DBase III
database management, BASIC, 289
Dempster–Shafer theory
coronary artery stenosis, ^{201}Tl scintigram, 333
Discharge patterns
chordotonal organ, precise mechanical stimuli, 179
3D modelling
biological structures, hidden-line removal, 55
DNA
databank search, sequence similarity, STATSEARCH, 293
IBM microcomputer program, GenBank database, genes search, 49
matrix representation, binding site patterns, consensus sequences, 81
models, nucleotide runs, statistical significance, comparison, 43
restriction maps, search algorithm, 247
sequence analysis program package, 387
sequence analysis, gm, 263
sequence database search sensitivity, 237
sequence database, BISANCE, 355
sequence database, SPLICE, 343
sequence editing spreadsheet, 401
sequence optimization, THOYO, 399
sequence similarities algorithm, 373
sequence, pattern probabilities, 347
DNA mapping
IBM PC AT/AMAP stochastic relaxation, 107
DNASIS™/PROSIS™
subdirectory management, 291

Electrophoresis
one-dimensional profiles, quantitative analysis, 93
EMBL
database, EMBNet update, 122
file server, molecular biological software, 121
Enzyme
activity, kinetics determination, 51
restriction site mapping, Pascal, 195
Enzyme kinetics
equilibrium data, COSY, SYNDAT, SIMKIN, MODFUN, 213
HPLC, BASIC, 395
EPIPLOT
prediction B cell/T cell epitopes, proteins, BASIC, 101
Evolution
selective pressure, protein homologous sequences, 223
Experimental design
knowledge-based, protein structure–function relationships, Sun 3/260 Workstation, ART, 205

FASTDB
DNA/protein sequence database, 237
FLUSYS
Perkin – Elmer fluorimeters data analysis, IBM, 118
FORTRAN
enzyme kinetics determination, 51
TENSOR, Taylor expansion formula, 173
FORTRAN 77
Apple Macintosh, sequence analysis program package, 387
quantitative analysis one-dimensional profiles, 93
STATSEARCH, GCG package, 293
VAX, 2-D/3-D image reconstruction, 253
YASA, scale-independent signal processing, 71

GELTRAK
quantitative analysis one-dimensional profiles, 93
Gene modeler
gm, DNA sequence analysis, 263
GW-BASIC
SUBSIS, 291

HCABAND
2D-helical representation protein, hydrophobic cluster analysis, 3
Histological sections
image reconstruction, 253
HIV envelope proteins
amphipathic helix, 165
^{1}H NMR spectra
lipid extract analysis, FORTRAN LIPICK algorithm, 29
Hydrophobic microdomains
object-oriented database, 357
Hypercard
enzyme kinetics Michaelis – Menten rate parameters, 113
GelFragSizer restriction fragment plotting, 113

IBM
FLUSYS, Perkin – Elmer fluorimeters data analysis, 118
IBM PC AT
AMAP stochastic relaxation, DNA mapping, 107
Microsoft C, INROAD II, 3D modelling, 55
Image reconstruction
2-D/3-D, histological sections, 253

LIPICK algorithm
FORTRAN, lipid extract analysis, ^{1}H NMR spectra, 29
Lotus 1-2-3
spreadsheet, DNA sequence editing, 401

Macintosh
dot plot sequence comparisons, Dotty Plotter, 117
Markov chains
pattern probabilities, DNA sequence, 347
Matrix representation
DNA binding site patterns, 81
MHV envelope proteins
amphipathic helix, 165
Microsoft C
3D modelling, 55
MODFUN
enzyme kinetics equilibrium data, 213
MS-DOS
CDS/ISIS database management, 126
MS-DOS compatibles
FORTRAN, HYPER, MEDIAN, enzyme kinetics determination, 51
MUCIDS
C environment, IBM, biological specimens, 229
polarized-light scattering, biological specimens, 229

Neural network
immunoglobulin domains, amino acid sequence, 319

Olga
Atari ST oligonucleotide primer design, PCR, 124
Pascal
Dotty Plotter dot plot sequence comparisons, 117
enzyme restriction site mapping, constraint checker, map generator, 195
IBM-PC, protein homologous sequences, selective pressure, 223
PC communication, laboratory instruments, 161
VAX S650, Scrutineer, 279
Pattern probabilities
Markov chains, 347
Pattern searching
RNA structure, 325
PC
communication laboratory instruments, 161
PC adaptation
BBC microcomputer, chordotonal organ discharge patterns, mechanoreceptor function, 179
PCR
Olga/Atari ST oligonucleotide primer design, 124
Perkin – Elmer fluorimeters
FLUSYS data analysis, 118
POLCA
library, randomly oriented images, 271
PROLANG
protein chemistry applications, BASIC, 128
SCAN command, protein sequence database, 403
Prolog
object-oriented database, 357
Sun 4, covariation analysis, 365
Protein
2D-helical representation, hydrophobic cluster analysis, 3
active sites, peptide hormones, moving window smoothing method, structure – function studies, 1
databank search, sequence similarity, STATSEARCH, 293
homologous sequences, evolution selective pressure, 223
sequence database search sensitivity, 237
structure–function relationships, 205
Protein expression
DNA sequence optimization, 399
Protein sequence
database analysis program, Scrutineer, 279

Randomly oriented images
library, POLCA, 271
Restriction maps
search algorithm, 247
Restriction site mapping
constraint checker, map generator, Pascal, 195
RNA
secondary structure prediction, 7
secondary structure, 309
structure detection, covariation analysis, 365
structure, pattern searching, 325
tRNA
IBM microcomputer program, GenBank database, genes search, 49

Scrutineer
protein sequence database analysis program, 279
Sequence analysis
program package, 387
scale-independent signal processing, YASA, FORTRAN 77, 71
Sequence similarities
DNA, algorithm, 373
SHIRKA
object-centred representation, taxonomy, 383
SIMFIT
modelistic biochemical studies, 23
SIMKIN
enzyme kinetics equilibrium data, 213
SPLICE
DNA sequence database, GenBank, 343
Spreadsheet
DNA sequence editing, 401
STATSEARCH
GCG package, protein/DNA databank search, 293
SUBSIS
DNASIS™/PROSIS™ subdirectory management, 291
SYNDAT
enzyme kinetics equilibrium data, 213

Taxonomy
SHIRKA, object-centred representation, 383
Taylor expansion formula
chemical rate equation, biochemical system simulation, 173
TENSOR
FORTRAN, biochemical system simulation, 173
THOYO
DNA sequence optimization, 399
^{201}Tl scintigram
coronary artery stenosis, 333
Tree comparisons
RNA secondary structure, 309
Turbo Pascal
COSY, SYNDAT, SIMKIN MODFUN, 213
modelistic biochemical studies, 23

VAX
RNA secondary structure prediction, 7

YASA
scale-independent signal processing, 71
